Poster cluster A:
- Insect viruses
- Food, water, environment
- Plant virology
- Vectorborne disease
- Focus on veterinary diseases

Poster cluster B:
- Comparative pathogenesis
- Viruses and cancer
- Latent and persistent infections
- Oncolytic viro-immunotherapies
- HCV/HIV elimination
- Influenza

Poster cluster C:
- Structural virology
- Fundamental aspects of the viral life cycle and virus-cell interaction
- Viruses and receptors / glycovirology

Poster cluster D:
- Virome/microbiome in health and disease
- Congenital & neonatal infections
- Gene therapy and gene editing
- Innovative diagnostics

Poster cluster E:
- Vaccines
- Antiviral therapy
- Anti-vial immune metabolism
- Broadly reactive antibodies immunotherapy

Poster cluster F:
- Evolution
- Emergin Infections at the human animal interface
- Focus on BSL-4 pathogens
